Amazing Science in the King James Bible

Fact #71

Order of Creation Agrees with True Science (Genesis 1)

Plants require sunlight, water, and minerals in order to survive. In the first chapter of Genesis we read that God created light first (v3), then water (v6), then soil (v9) and *then* He created plant life (v11).

Fact #72

God Created "Lights" in the Heavens "for Signs and Seasons, and for Days and Years" (Genesis 1:14-16)

We now know that a year is the time required for the earth to travel once around the sun. The seasons are caused by the changing position of the earth in relation to the sun. The moon's phases follow one another in clock-like precision - constituting the lunar calendar. Evolution teaches that the cosmos evolved by random chance, yet the Bible agrees with the observable evidence.
