## The Amazing Heart

The heart is an involuntary muscle in the chest cavity. It weighs about 4½ pounds, but what a work it does for us! It beats at least:

70 times a minute  
 4200 times an hour  
 100,800 times a day  
 705,600 times a week  
 36,691,200 times a year!

For a 70-year-old, that is 2.5 billion beats a lifetime!

"For the life of the flesh is in the blood:..." (Leviticus 17:11a).
